PRODUCT DATA SHEET

Item Number : MAT220
Item Name : PIG® Universal Rolls – Heavy-Weight
Absorbs : Oil, Water, Coolants and Solvents
Content / Packaging : 2 Rolls / Bag
Color Product : Grey

Roll Dimension : 38 cm x 46 m
Composition Mat : 100% Polypropylene

Absorbency per Product : 77,7 L / Roll
Absorbency per Packaging : 155,4 L / Bag

Weight per Packaging : 13,6 Kg
Packaging / Euro Pallet : 12
Packaging / Block Pallet : 12

Description

An Absorbent Mat designed to cover areas prone to overspray and spills. Absorbs water-based liquids, petroleum products and solvents. Perforations make the mat more convenient to use by eliminating the need for scissors or a utility knife.

Application

There are two main uses for PIG® Universal Mat: everyday use and emergency spill cleanup. The most common use of the mat is to make and keep floors cleaner and safer, free of any water-or oil-based fluids that may cause an accident. Absorbent mats are used daily in areas subject to overspray.

Features / Benefits

- ☐ Absorb leaks and spills to keep floors dry and workers safe. Strong, durable PIG® Mat lasts longer so you use less Mat and spend less time replacing it.
- ☐ Eight-layer, thermally bonded construction won't rip, tear or fray, even when saturated
- ☐ 100% polypropylene (now made with 50% recycled content)
- ☐ Exclusive dimple pattern speeds wicking of liquid throughout Mat for faster, easier cleanup
- ☐ Highly absorbent, fine-fiber construction won't leave behind liquids or fiber residue
- ☐ Absorbs and retains oils, coolants, solvents and water
- ☐ Made with 50% recycled content
- ☐ Dark gray color hides grime, so Mat stays on the job longer
- ☐ Heavy-weight construction is highly durable and absorbent for demanding tasks and large-volume cleanups
- ☐ Perforated Mat is easy to tear to size so you only use what you need
- ☐ Rolls are ideal for covering large areas and soaking up leaks and overspray
- ☐ Flame-resistant material won't burn immediately like cellulose mats; melts when exposed to high heat while on the job
- ☐ Can be wrung out and incinerated after use to reduce waste or for fuels blending
