

PRODUCT SPECIFICATION

Clay Drain Cover Set

Description:

A clay drain cover that can be moulded aid sealing and preventing spills from flowing into sewers, floor drains and out through doorways, particularly on uneven surfaces.

Materials:

Clay C/W Polythene outer layers

Instructions For Use:

At all times, where there is a danger, use the appropriate Personal Protective Equipment for the liquid involved.

Precautionary Protection Of A Sensitive Area or Drain.

Peel off the plastic outer layer off of one side of the cover. Place this side down over the area to be sealed.

Firmly press down around the edges of the cover to ensure adhesion and a suitable seal.

If already flowing:

Apply the drain cover as described above, and then apply weight to the cover to ensure a complete seal.

If using more than one:

Peel back the top outer layer and overlap the edges of the covers by approx. 15mm. Mould together to give a suitable seal.

Handling & Storage:

No special handling is required

It is recommended that this product is kept dry at an ambient temperature in storage.

Disposal:

Dispose of contaminated materials must be made in accordance with local regulations for the liquid involved.
