

SAFE 2

Visor solution for safety helmets and hearing protection

The SAFE 2 visor carriers are designed to be combined with safety helmets and SAFE visors, with or without hearing protection.

The straight carrier is for helmets without cut-outs for earmuffs or when the slot is placed aligned with the helmet brim. The low peak carrier is for helmets with cut-outs or when the slot is placed above the helmet brim.

The FLEX carrier is equipped with an extra rubber seal to prevent rain, sawdust and other particles from falling down between carrier and helmet.

Features

- » Compatible with most helmets on the market and all Hellberg visors
- » Smooth movement of the visor and a firm stand-by position

Visor range

Regardless of the work task or type of hearing protector required, you can easily find a visor for your needs. Thanks to the uniform design, the visor and carriers can be combined with hearing protectors and safety helmets, or be used as stand-alone visor solutions.
