VERTEX® ST

The VERTEX ST helmet is designed for protection against impacts and falling objects during ground level work. Its unventilated shell protects against electrical hazards and molten metal splash. Its six-point textile suspension ensures maximum comfort, and its CenterFit adjustment system adjusts the headband and keeps the helmet centered on the head. The VERTEX ST is designed for optimal attachment of a PIXA or ULTRA VARIO headlamp, a VIZIR, VIZIR SHADOW or VIZEN protective shield, and hearing protection.

The headband is adjusted by simultaneously operating the two CenterFit adjustment wheels. The adjustment wheels are easy to manipulate while wearing gloves. The CenterFit system allows the helmet to be perfectly centered on the head for a better fit.

Petzl helmets adapt to your lighting needs and additional protection requirements in seconds.

Short Description Comfortable helmet for industry

Selling Points

- Optimal protection for industry:
 - shock absorption achieved through deformation of the outer shell
 - its closed shell offers protection against electrical risk and molten metal splash
 - limits risk of choking, thanks to a chinstrap designed to release if snagged (strength less than 25 daN)
- Very comfortable to wear:
 - six-point textile suspension conforms perfectly to the shape of the head
 - CenterFit adjustment system adjusts the headband and keeps the helmet centered on the head
 - comes with two sizes of headband foam
- Many accessories are available in order to adapt the helmet to its use:
 - PIXA or ULTRA VARIO headlamp (front and back slots)
 - headlamp with elastic headband (headlamp clips)
 - VIZIR, VIZIR SHADOW or VIZEN protective shield (side inserts)
 - hearing protection (side slots)

Specification

- Head circumference: 53-63cm
 - Weight: 455g
 - Material(s): ABS, nylon, polycarbonate, high-strength polyester, polyethylene
